

WARWICK

SUMPTUOUS AND VERSATILE - Clique by Warwick

Overview: The popular and dependable GRAVITY has been transformed and reimagined into a sumptuous and striking quilted quality - CLIQUE. Boasting the original chevron texture of GRAVITY, CLIQUE introduces a third dimension with a quilted hexagon pattern. Pairing durability and reliability with tactile and visual interest, this combination will incorporate contemporary design and youthful appeal to both residential and commercial interiors.

- Application: CLIQUE and GRAVITY both boast a heavy commercial usage, AS1530.3 fire rating and Oeko-Tex certification. Soft yet durable, these qualities are equally suitable for a multitude of applications. The small-scale quilted hexagon of CLIQUE lends itself perfectly to chairs, bed heads and cushions, while the micro chevron texture of both fabrics make them widely suitable for larger scale upholstery and ottomans as well. Commercial and residential spaces will be softened in texture while enlivened visually by the geometric quilting contrast brought by CLIQUE.
- Colourways: Featuring a comprehensive collection of 18 colours each, CLIQUE and GRAVITY offer 36 skus in total, delivering a plethora of playful yet sophisticated hues to choose from. The existing selection from GRAVITY has been updated to include four new contemporary colours: Onyx, Petal, Scarlet and Teal. Sand, Steel and Slate offer soothing, neutral tones, while Pomegranate, Scarlet and Brick bring punchier warmth. Cooler, nature inspired hues are found in Denim, Forest and Cloud, which will help to create a calming and grounding aesthetic.
- Rating: Fire rated to AS1530.3 standards and Oeko-Tex certification, CLIQUE and its partner GRAVITY are a durable heavy commercial duo that will work in harmony together to create a visually diverse interior, or can work equally as well individually. Ever reliable GRAVITY is tried and tested in both the residential and commercial markets, and CLIQUE will easily become a fun and fresh favourite to uplift and transform interiors with the added benefit of a group number classification of 1.
