

WARWICK

A PLACID PALETTE FOR TEXTURAL, REFINED STYLE - MALTA by Warwick

Overview: MALTA is a wide-width, transitional drapery fabric inspired by the coastal colours and history from this Mediterranean nation. This fabric's polyester, cotton blend gives MALTA a soft, sophisticated nature suited to any environment.

- Design: With a plain weave construction, MALTA is piece dyed with cationic yarn to give its two-tone appearance. A raw yet refined nature, MALTA's matte finish and dry, textured handle bring a relaxing feel to any interior with its 300cm wide-width properties.
- Application: MALTA offers a perfect plain weave with a soft pastel palette for all drapery applications from large architectural windows to small domestic environments. MALTA is also suitable for the likes of Roman blinds and lampshades adding soft, subtle and relaxing texture to a space.
- Colourways: Combining a natural, pastel palette with subtle two-tone texture, MALTA's 16 colours offer an adaptable drapery option suited to most applications. Oatmeal and Sand offer timeless neutrals working as fantastic base layers for a space. Rosewater, Celery and Sky add gentle pastel colours for subtle contrast without overpowering an environment. Tones of Denim and Charcoal add a deeper contrast with more drama and mood.
- Rating: MALTA is wide-width (300cm) and Oeko-Tex certified. With its well-considered palette of neutral and pastel tones, MALTA is a versatile drapery option with a soft, textured handle. Serene, sophisticated and transitional, MALTA is suited to most interior schemes.
