

WARWICK

SCRIM SHEERS WITH TEXTURAL ELEGANCE - PHOENIX by Warwick

Overview: PHOENIX brings elegant texture and movement together to create this sophisticated sheer. With a continuous 310cm wide-width, this self-weighted and FR rated fabric is suited to an array of contemporary interiors, delivering the perfect drape with a light and breezy nature.

- Design: The yarn-dyed, poly-cotton combination gives this loose scrim weave a slight lineal look and matte sheen. PHOENIX flows with textural interest and movement, bringing a serene and sophisticated nature to a selection of spaces.
- Application: PHOENIX is FR rated and self-weighted, featuring a continuous, wide-width (310cm). These qualities make it perfect for large architectural windows, loosely styled Roman blinds and most drapery applications – creating textured, light filtered privacy in a selection of timeless tones.
- Colourways: This sophisticated scrim has nine classic and adaptable colours in its range. Pearl, Sand, Quartz and Frost offer a selection of lighter neutrals that create a perfect backdrop - blending seamlessly into any environment. Slate, Ash, Flint, Chocolate and Steel bring moodier mid-tones to this collection, adding more impact and contrast to a space.
- Rating: FR tested to AS1530.3 standards with a continuous wide-width and self-weighted finish - PHOENIX brings a breezy, relaxing nature to most interiors. The loose scrim-weave and poly-cotton composition give this fabric its tonal texture, creating elegant movement and interest in a space with a selection of understated skus.
