CREATE A RELAXED OUTDOORS ESCAPE WITH STYLISH TEXTURE – STRADBROKE by Warwick

STRADBROKE is a contemporary, surroundings inspired collection using subtle texture, organic aesthetics and landscape evoked colours to create a transitional mix and match compilation for use in residential and commercial settings.

- **DESIGN:** STRADBROKE, part of our Renew range, is a tactile, trend driven collection made using recycled olefin to sustainably withstand outdoor environments. Each texture is named after Australian islands known for their natural endearing beauty and designed with a tactile, dry finish and jacquard weave. Incorporating interior appeal through texture and colour with the performance standards of outdoor, STRADBROKE is complementary to its surroundings using tonal boucle, micro checkerboard and small-scale houndstooth.
- **APPLICATION:** Combining practicality with a luxe appeal for sophisticated styles in residential and general commercial spaces, STRADBROKE is a washable collection designed to withstand sun exposure, mould/mildew growth, chlorine, and general wear and tear. Considered a transitional range suitable for indoor and outdoor living where the refinement of indoor fabrics can be replicated in outdoor settings.
- **COLOURWAYS:** Available in seven colourways, the collection has been coordinated taking inspiration from the Australian elemental eco-system. Ivory, beach and sand offer neutral, yellow, dune-scape tones with coral and ocean woven with the deep, underwater richness of red and blue. Moss is a native green flecked with beige mimicking mottled tree leaves and carpeted moss forests with Gull a contemporary black and beige, rocky inspired combination.
- **RATING:** Part of our SUNDEC range with Halo easy-clean properties, Oeko-Tex certification, STRADBROKE is also certified for quality management system ISO9001 and has an AS1530.3 fire rating.
