

WARWICK

AN ELEMENT OF GLAMOUR - Titanium by Warwick

Overview: TITANIUM is a new release that signals the trend of metallics is here to stay. Used as an accent or bold statement, TITANIUM's comprehensive range of embroidered, print, pleat and weave fabrics can introduce a subtle shimmer to refine interior spaces with an inherent sense of sophistication. TITANIUM is available as indent only.

- Application: Metallic highlights used for cushions and ottomans will give coordinating colours a unique sense of richness. More liberal use of metallics across upholstery pieces and drapery makes a confident, designer statement, adding an irresistibly glamorous dimension to any room they are applied to.
- Designs: Pared back embroidered patterns, geometrics, gentle textural prints and ethnic influences play across a range of 13 designs with luxuriously tactile qualities.
- Colourways: From burnished tones to subtle sheens and instant glamour, metallic inspired tones dominate a versatile range that will appeal to a broad market.
