

WARWICK

A COLLECTION OF TIMELESS STRIPES AND CHECKS FOR A RELAXED, CONTEMPORARY INTERIOR - SALFORD by Warwick

Featuring timeless stripes and checkered patterns, SALFORD is a contemporary, multi-purpose fabric with a relaxed aesthetic. Versatile in its designs, SALFORD will sit comfortably in an array of spaces, creating classic yet casual moods and interiors for both residential and commercial settings.

- **DESIGN:** In four jacquard woven designs, SALFORD embodies a raw and organic aesthetic. Made from a natural fibre blend, this collection has a slight lustrous sheen which provides a polished, sophisticated look. WELLS and PLYMOUTH are two, small-scale ticking stripes, while SALFORD brings a small-scale check pattern into the mix. And lastly, our popular HUSK fabric features in this range to offer a complementary plain to pair back with SALFORD's designs.
- **APPLICATION:** From coastal residential, to casual commercial interiors, SALFORD takes on an organic and relaxed appearance, and creates textural atmospheric spaces. SALFORD is a multi-purpose fabric and can be used to create classic and timeless drapery and furniture pieces that are refined and sophisticated in style
- **COLOURWAYS:** With a generous palette of 12 colourways, SALFORD offers both neutral and coloured hues that will suit a myriad of interiors. Linen and Driftwood bring a selection of warm options for a natural aesthetic, while Marble and Ice provide cooler alternatives. On the darker side of the spectrum, Onyx and Steel bring striking finishes with their strong grey and black tones. The palette is also invigorated with the addition of colourful shades of Lemon, Peach and Musk, yet still offers classic, traditional tones of Atoll, Amalfi and Abyss.
- **RATING:** Contemporary with a natural blend of yarns, SALFORD offers a modern selection of check and stripes for residential and commercial spaces alike. Its versatility creates room for creativity and can be used in a variety of different spaces, as well as for both drapery and upholstery applications.
