

WARWICK

Guarantee

Since 1966 Warwick have supplied fine furnishing fabrics which have been quality tested to world standards for performance, durability and safety.

For a period of three years for both domestic and commercial applications, we guarantee to replace any fabric which is found to be faulty as a result of manufacturing defect and which has been used in accordance with our performance ratings and care instructions.

The Warwick Quality Guarantee is additional to all statutory rights and remedies that are available to our customers under Australian Consumer Law.

In the event of any fabric claim Warwick customers will be provided with a comprehensive service form to be completed and returned to Warwick to facilitate prompt processing.

Full terms and conditions of the Warwick Quality Guarantee are available upon request. Please email info@warwick.com.au or fax 03 9416 1060.

WARWICK Macrosuede®

Macrosuede, withstands
the tests of time.

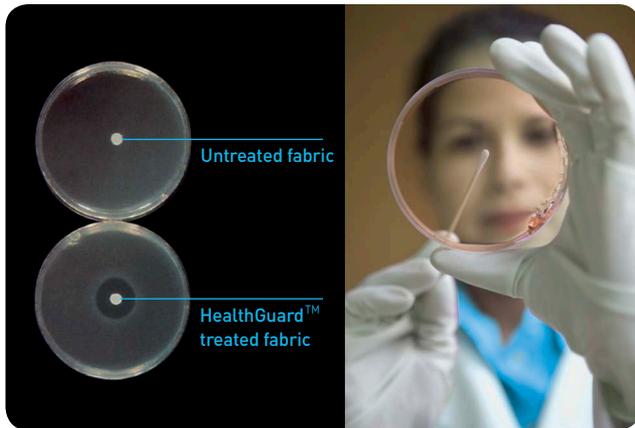

Macrosuede

Ticks all the boxes

Kids

Macrosuede is the only man-made suede in the world to incorporate 'HealthGuard', offering in-built protection against dust-mite pathogens, great news for over 2 million Asthma sufferers throughout Australasia and children are particularly at risk. One in four Australian children experience some sort of respiratory condition.

Warwick Macrosuedes are tested for 'heavy commercial' durability and have gained wide exposure in commercial markets where they are also tested to Australian/NZ Fire Hazard Properties Standard AS 1530.3.

The petri dishes above show the difference between a HealthGuard treated sample and an untreated sample. The surroundings of the HealthGuard treated fabric were resistant to *Staphylococcus aureus* MRSA A129 to a distance of 6mm.

Pets

Scratch-resistant and pet-friendly, Warwick Macrosuedes are engineered to resist scratches in a way no natural leather can. Drag a corkscrew across the surface to mimic the effect of pet claws. While some marks may remain,

the bulk of them can be rubbed or brushed away. Pet hairs can also be easily removed with a damp cloth.

Parties

Easy clean

Try spilling a glass of water on Warwick Macrosuedes. Liquid spills simply bead on the surface. Blotting with a paper towel or colourfast cloth removes the liquid easily. Warwick Macrosuede technology also incorporates anti-static chemistry which prevents the attraction of dust particles and acts as a fluorochemical agent releasing stains.

Warwick Macrosuedes are compatible with independent retail fabric protection and guarantee programs. These programs may enhance the fabric's ability to resist liquid staining by providing a

spill-repellent surface and/or warranties to cover accidental damage. They will not reduce the efficacy of the HealthGuard treatment.

New fashion colours

Relax in style. Macrosuede and Macro-Soft are now available in an expanded range of the latest decorator colours, which are fully tested to international colourfast standards.

Cool in summer and warm in winter

Macrosuede and Macro-Soft are woven suedes which 'breathe' to provide perfect comfort all year round.

Protection

Look for the Macrosuede Hallmark!

Macrosuede and Macro-Soft are registered trademarks that guarantee the exclusive quality and tailoring characteristics of Warwick Fabrics' high performance man-made suedes. Since 2006, to protect against cheap copies, each of these products included a printed hallmark on the reverse side of the fabric.

Lesser quality suedes are easily distinguished by their lightweight and shiny or 'grainy' surface or even 'striping' caused by the use of cheaper yarns and inferior dyestuffs. If the finished weight of the fabric

is reduced too much, the upholstery is also prone to unsightly puckering along seams.

So beware of generic suede names such as 'Microsuede', and where possible ask your furniture retailer to unzip cushion covers to show the true Macrosuede hallmark.

WARWICK

Macrosuede®

The 'original' heavy duty Macrosuede now with HealthGuard and 18 new colours*. Dense woven construction provides excellent tailoring characteristics and natural suede appearance. High energy dyestuffs for maximum colourfastness.

Care and cleaning

Warwick's premium quality Macrosuedes help furniture look younger for longer. They respond superbly to cleaning tests on some of the most common household stains, such as red wine, tea and coffee, chocolate, shoe polish, make-up and ink.

Spot cleaning

Treat spills and stains as soon as possible. Gently scrape any soil or mop any liquid from the fabric surface. Apply proprietary cleaning agents strictly according to instructions. Use of soap or detergent with water should be approached carefully. Over zealous rinsing to remove soap residue may result in over-wetting, water marking and possible wetting of substructure. This may create other stains or damage.

Non-oil based stains

Pre-test the cleaning method on a hidden part of the furniture, using warm water and non-toilet soap (Vanish/Sard Wonder Soap are available from most supermarkets). Mix a small amount of soap and warm water solution and apply to the stain, rubbing gently. Blot dry with a clean towel. Apply cool water (preferably distilled or filtered water) and blot dry again. Then with a hairdryer, working out from the centre of the stain, dry quickly to prevent rings forming.

It is generally preferable to clean whole panels of fabric in this way rather than trying to spot clean specific areas. Halo

Spot Cleaner is a special non-solvent based cleaner from the Warwick Halo Fabric Care Kit. Quick and simple, it demonstrates the easy cleaning properties of all Warwick Halo upholstery fabrics.

Oil based stains

As above, apply a proprietary brand solvent based cleaner and generally try to ensure the cleaning is done in full panels, not spot cleaned. A helpful industry secret is to remove oil based biro marks by applying conventional hairspray.

Regular care

Remember the long term villain, DUST, is settling daily on your favourite furniture pieces. Highly visible on coffee tables and polished surfaces, dust is quite often unnoticed on upholstered furniture. Yet accumulated dust and grit work their way into the fibres and act like miniature 'grinders' which ultimately lead to the breakdown of even the strongest fabrics. So please take care to vacuum regularly (weekly) using low suction, to significantly extend the life of your furniture.

When arranging your furniture, take care to avoid touching external walls or radiators. This prevents problems of moisture build up and/or scorching damage.

Protect from direct sunlight

It is important to note that no fabric is 100% colourfast and that it is impossible to prevent colours fading if adequate precautions are not taken. Winter sun, sitting lower in the sky, can cause the most damage, particularly when protective curtains have been opened to warm the room. Rotate reversible cushions regularly to extend the life of your seating.

Macro-Soft cleaning note

Macro-Soft's distinctive herringbone pattern requires cleaning to be carried out a little differently. It is recommended that a cleaning agent be applied to a clean, white cloth and gently rubbed on to the soiled area. Over application of cleaning agents directly to the Macro-Soft surface may cause the stain to spread, as it is 'channeled' by the herringbone structure.

Completing the stain removal

process

Once residual stains are removed, deodorise the affected area to remove any lingering odours. Then re-apply fabric protector to restore any liquid repellency that may have been removed along with the stain.

The Warwick Halo Fabric Care Kit

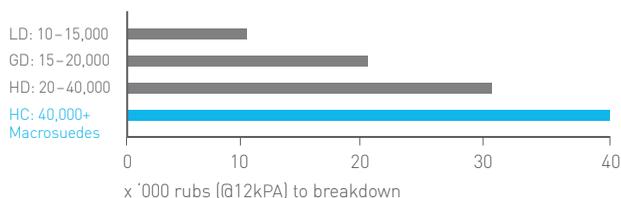

To further enhance spot cleaning results, Warwick have introduced the Halo Fabric Care Kit which includes Halo Spot Cleaner for most household stains, Halo Fabric Deodoriser to help neutralise pet and general odours and Halo Fabric Protector to restore liquid repellency on fabric sections that have been spot cleaned. The Halo Fabric Care Kit is available from most furniture retailers.

Durability

Martindale rub test (ISO 12947)

In laboratory conditions fabric samples are continuously rubbed under pressure until the fibre is observed to fatigue. Warwick Macrosuedes are classified as suitable for Heavy Commercial Upholstery use.

LD – Light Domestic

Suitable only for upholstery intended for occasional, decorative or light usage.

GD – General Domestic

Suitable for most styles of upholstery for general daily domestic use.

HD – Heavy Domestic and General Commercial

Suitable for upholstery normally subjected to heavy domestic use including motion furniture, and for general commercial use.

HC – Heavy Commercial

Suitable for upholstery normally subjected to heavy commercial use including motion furniture, bar stools, tub chairs and dining chairs where the furniture is used throughout the day in commercial environments.

Test Standards

Colourfastness

Where 1 = Poor and 5 = Excellent

Colourfastness — standards shown are those which represent the highest requirement for domestic upholstery fabrics.

Description	Industry Requirement	Macrosuedes
To Light-Xenon Arc (ISO 105/B02)	5	5
To Water (ISO 105/E01)	4	5
To Rubbing (ISO 105/X12)	4 (dry) 3 (wet)	5 (dry) 4/5 (wet)
To Shampoo (AS2111.19.2)	4	5
To Dry Cleaning Solvent (ISO 105/D01)	4	5

Pilling

Description	Industry Requirement	Macrosuedes
Pilling Resistance (ISO 12945-2)	3/4	5

Fire Hazard Properties (AS1530.3)

Where 0 = Optimum Result

Description	Measure	Macrosuedes
Ignitability Index	Range 0–20	10
Spread of Flame Index	Range 0–10	0
Heat Evolved Index	Range 0–10	3
Smoke Developed Index	Range 0–10	5

Warwick performance standards meet or exceed industry requirements. All test results shown are intended as a guide to durability based on actual test results or supported by Warwick Fabrics published assessment on the cloth.
